History

Founded in 2012 by James Zwane and Marlon Murahwa, Pace was created after having seen how the advent of a wave of technological advancement had the potential to drastically change the way people lived. The “post Facebook” world was very different to the

previous information age and Zwane and Murahwa realized that a special period in history was on the horizon. They created Pace to take advantage of what would become known as the 4th Industrial Revolution.

Pace Online (PTY) LTD is technology company based in South Africa that specializes in enterprise solutions and digital products with specific attention to fourth industrial revolution technology. We believe in the power of what we do to improve quality of life and create value. We believe technology is a powerful tool in unlocking human potential and we are relentless in the pursuit of innovation to achieve this goal.

Pace is 100% black, youth owned and although we have a diverse staffing one of our objectives is in empowering young girls and young black women in technology. We do this through our support of the </> div:a initiative.

As a company we see the introduction of technology into African spheres and sectors as an opportunity for Africans to break down barriers and for the world to learn from us.

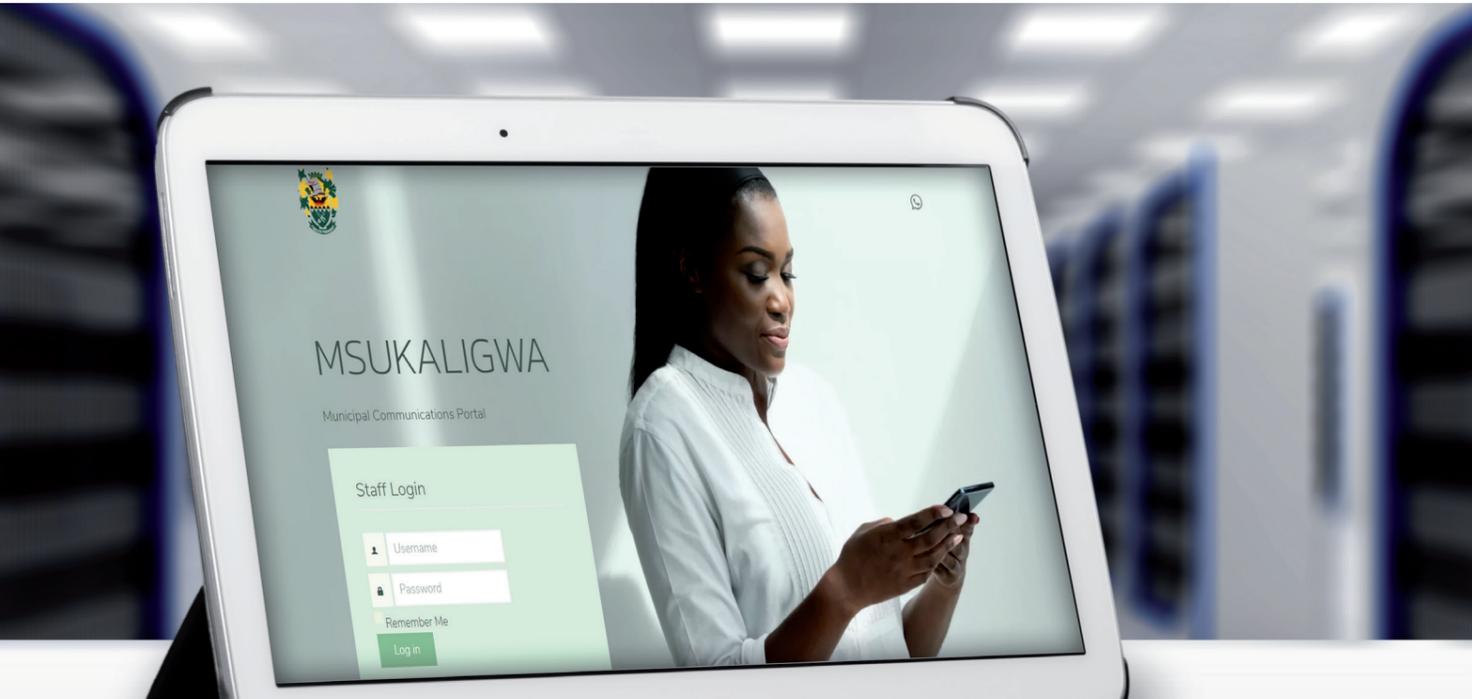

Technology

Pace uses a state of the art integrated DevSecOps environment to develop, test and deploy systems across a wide range of platforms, application stacks and devices. The Pace development environment is both flexible enough to allow turnkey project scalability and secure enough to Technology implement change management and knowledge transfer without compromising data integrity. Pace primarily uses Scrum agile development methodology and behavior driven development for client communication.

Our Specialities Include:

- i. LAMP Stacks
- ii. Node.JS runtimes
- iii. Jakarta EE
- iv. MongoDB
- v. HTML5 CSS3 – UIKit Framework Based Frontends
- vi. Zend, Cake and Code Igniter Frame Works Backends
- vii. Native Swift, Android Java and Xamarin cross platform architectures

The Mangement Team

James Zwane

CEO. James has been at the helm of Pace since its founding and brings with him a wealth of relationships and marketing expertise. As a C# graduate of CTI James was introduced to development at a young age and has combined his technical know-how and the art of the deal to take Pace from strength to strength.

Xolani Nyuswa

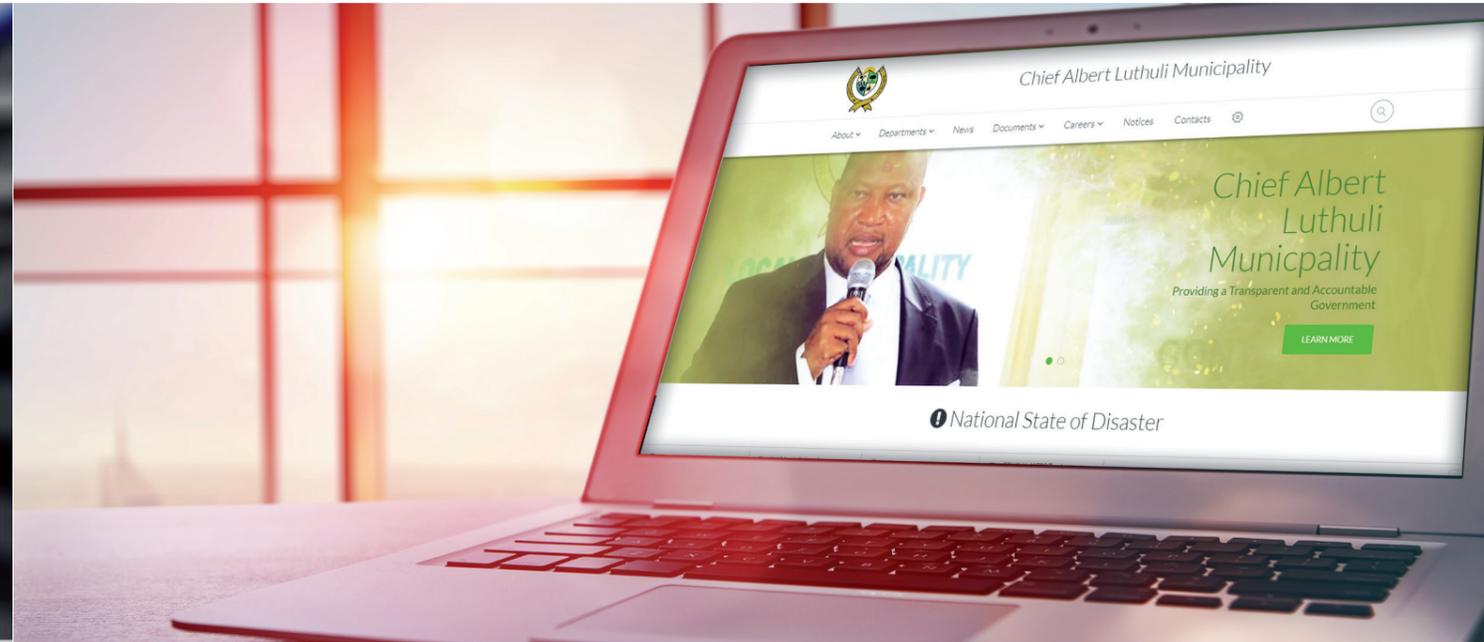

Head of Operations. Xolani has a long history of running operations at different organizations. His experience balances the dynamic enthusiasm of the young Pace team and his reliability is the oil of the Pace machine.

Marlon Murahwa

Head of I.T. With more than 12 years of experience delivering enterprise technology solutions around the world, Marlon brings an array of technical skills from design, architecture, programming and consulting to Pace.

Bongathini Mofokeng

Senior Project Manager. Bonga cut his teeth at Dimension Data before becoming an integral part of the Nedbank team. His analytical skills and team management are at the core of the Pace delivery pipeline.

Products

Fulcrum

Fulcrum is Pace Online's flagship ERP. Fulcrum runs organizations ranging from District Municipalities in Mpumalanga to wine farms in Cape wine lands. The ERP is a more affordable scalable option to SAP and is under continuous development by Pace.

UPLIFT.africa

UPLIFT.africa is platform for Africans to use technology to help them realize the potential of their talents in the spheres of arts, music, sports, entrepreneurship and charitable initiatives. From unsigned artists to under-capitalized businesses, UPLIFT.africa empowers Africans who would otherwise find exposure and markets inaccessible.

MzansiMart

MzansiMart is Pace's ecommerce platform for local businesses. In simple terms an online megamall where South Africans can sell their goods directly on the platform and fulfillment will be handled automatically in the backend. MzansiMart has a website and mobile apps for shoppers and shopkeepers creating a seamless experience online and in your pocket.

GovTaxi

GovTaxi is Pace's ride hailing service aimed at civil servants. Through GovTaxi nurses, teachers, doctors and other civil servants who are an often overlooked and underappreciated sector of our society will have access to safe and affordable transport with the ability to budget for transport in advance.

Services

Web Development

Intranets, Verticals, Web Applications and Web Based Systems are our specialty.

Enterprise Software

We build custom software with big data and integration capability. Let us automate I.T.

Mobile Applications

Pace builds Android and IOS applications from UX design right to the app store.
